Project/grants achievements (from the last 10 years)	<p><u>Manager of 3 projects:</u></p> <ul style="list-style-type: none"> – 1 NCN project (Miniatura 3, 2020) – 2 projects in the frame of internal SGGW calls for young scientists (2011, 2012) <p><u>Contractor in the following projects:</u></p> <ul style="list-style-type: none"> – 1 NCBiR project (2007-2010 research and development project) – 1 PARP project (2018, research project) – 1 UE project (7th Frame Programme Regpot) – 1 KBN project (2005-2006, supervisor's project) – 2 implementation projects (KZL) commissioned by Herbapol Lublin – 12 projects commissioned by the Ministry of Agriculture and Rural Development (8 – in the field of organic farming, 1 - in the frame of biological progress in plant production, 3 - in the field of plant genetic resources protection) <p>All above listed projects concern wild-growing and cultivated medicinal and aromatic plants.</p>
Topic – research problem – for which the candidate supervisor seeks a doctoral student	<p>Studies concerning the range of morphological, developmental and chemical variability of wild-growing and cultivated species of medicinal and aromatic plants, both native and foreign. Research will be focused on the impact of internal and external factors on the yield and quality of selected herbal raw materials, reflected in their chemical composition and biological activity. Studies will be carried out both on natural sites and in the cultivation. Chemical profile of examined raw materials will be determined by the usage of modern extraction and separation techniques. Undertaken investigations will be characterized by a scientific and practice value. Special attention will be paid on the usefulness of selected raw materials to apply in the phytopharmaceutical industry.</p>
